

Noise – Sound – Vibration – Heat stress - Instrumentation

This instrumentation is designed for working area monitoring.

ECM is offering a modular instrumentation system allowing to monitor noise, sound, vibrations and heat stress. The instrumentation is ranging from miniature monitors fixed on clothing up to Professional monitoring equipment of highest category.

Noise / Sound monitors

Sound calibrator

Vibration calibrators are fixed on arm, seat or other exposed part.

The heat stress monitors measure „dry and wet“ temperature, radiation, moisture and draft.
